

Dear valued VENTOsan® customer,

what started off with the first house ever equipped with our VENTOsan® decentralised ventilation technology has now developed into one of the biggest successes in our company history.

We personally would like to thank our thousands of satisfied customers in Japan using VENTOsan® for more than 6 years now for the pleasant cooperation and for your confidence and loyalty in us. We, together with our partner EDFs Inc., are looking forward to a mutual successful future with you, dear customers.

With our strong brand VENTOsan® combined with our knowledge and technology we ensure and commit ourselves to offer our customers high-quality products „Made in Germany“.

As a leading manufacturer of energy-efficient decentralised ventilation solutions in Germany for more than 17 years now we were, are and will be your trustworthy partner for fresh, healthy air in your living spaces.

Please be assured that we will continue doing our utmost to improve our devices and services and commit ourselves to develop new solutions to meet your expectations.

With our constant research and development combined with our strong partner EDFs Inc. on-site we guarantee an optimal support for you, an easy and simple installation in your apartments and houses, a comprehensive package of services.

As part of the globally operating Volution group we are optimally positioned for tomorrow's challenges.

“We care for you to breathe healthily, save energy and live more comfortably- without having to think about ventilation. It is just there, the airflow. Follow the path of thousands of satisfied users: Ventilate ingeniously easy with the original, ventilate with VENTOsan®.”

*Annett Wettig, CEO of inVENTer GmbH*

Thank you very much,  
Yours sincerely,

**Your VENTOsan® partner in Japan:**
