

Dear valued inVENTer users in Japan,

I would like to personally thank you for using our inVENTer – single room ventilation with heat recovery.

We had already made a tiny milestone, installing over 100,000 units in Europe and over 2,500 units in Japan. And we intend to further improve our quality and service to customers. In this respect, if we may, we would like to take this opportunity to announce that:

1. Our new partner EDFs Inc. started its operation as sole distributor in Japan.
  - We terminated the wholesale contract with Passiv Energy Japan (PEJ) Inc. on 22nd March 2012.
  - Edifice Energy Saving Technology (EDFS) Inc. can respond to all the needs for our products. That is to say, while we work together (OHT GmbH and EDFs Inc.), strengthening our capability in terms of sales, technology, maintenance, etc. in order to attain more satisfaction of our customers.
  
2. Introduction of the new name VENTOsan.
  - Our ventilation system with heat recovery – in Europe (and formerly in Japan) called “inVENTer” has now a new name in Japan: “VENTOsan”
  - Incidentally, all the products we sell are manufactured in Germany.

At this time, we would like to express our thanks to you for your trust in our products, and we are committed to improving our operation in order to better serve you.

Thank you and most cordially,

Dipl. Engineer Mr. Peter Moser  
Chief Executive Officer  
Oeko-Haustechnik inVENTer GmbH  
Ortsstraße 4a
